Administration of Medication Policy

Rationale:

The policy as outlined was put in place to;

- Clarify areas of responsibility
- To give clear guidance about situations where it is not appropriate to administer medicines
- To indicate the limitations to any requirements which may be notified to teachers and school staff
- To outline procedures to deal with a pupil with a nut allergy in our school
- Safeguard school staff that are willing to administer medication
- Protect against possible litigation.

Relationship to School Ethos:

St. Francis NS promotes positive home-school contacts, not only in relation to the welfare of children, but in relation to all aspects of school life. This policy is in keeping with the school ethos through the provision of a safe, secure and caring school environment and the furthering of positive home-school links.

Aims of this Policy:

The aims and objectives of the policy can be summarised as follows;

- Minimise health risks to children and staff on the school premises
- Fulfil the duty of the Board of Management in relation to Health and Safety requirements
- Provide a framework within which medicines may be administered in cases of emergency or in instances where regularised administration has been agreed with parents/guardians

In-School Procedures:

Parents are required to complete a Health/Medication section on the school enrolment form when they are enrolling their children in the school. No teacher is obliged to administer medicine or drugs to a pupil and any teacher willing to do so works under the controlled guidelines outlined below.

- **Prescribed medicines only** (i.e. medication with printed pharmacy label re prescription details) will be administered following the acceptance by parents of the terms and conditions agreed by the Board of Management as outlined in this policy. The Board will seek indemnity from parents in respect of any liability arising from the administration of prescribed medicines.
- The school generally advocates the self-administration (e.g. inhalers) of medicine under the supervision of a responsible adult, exercising the standard of care of a prudent parent. Only at the request of a parent, prescribed medication will be kept by the class teacher. Parents are responsible for the provision of medication and notification of any change of dosage.
- School staff have a professional duty to safeguard the health and safety of pupils, both when they are authorised to be on the school premises and when they are engaged in authorised school activities elsewhere.
- The Board of Management requests parents to ensure that school staff be made aware in writing of any medical condition suffered by any child in their class coupled with detailed instructions on the method by which medicines are to be administered.
- No staff member is compelled to undertake the administration of medicines or drugs.
- All staff will be briefed on any child requiring supervision or assistance on the taking of emergency and long term medication.

Long Term Health Problems

Where there are children in school with long-term health conditions, proper and clearly understood arrangements for the administration of medicines must be agreed with the Board of Management. This is the responsibility of the parents/guardians. It would include measures such as self-administration, administration under parental supervision or administration by school staff.

Life Threatening Condition

Where children are suffering from life threatening conditions, parents/guardians must clearly outline, in writing, what should be done in a particular emergency situation, with particular reference to what may be a risk to the child (Appendix 3). If emergency medication is necessary, arrangements must be made with the Board of Management. A letter of indemnity must be signed by the parents in respect of any liability that may arise regarding the administration of medication.

Guidelines for the Administration of Medicines

- The parents of the pupil with special medical needs must inform the Board of Management in writing of the condition, giving all the necessary details of the condition. The request must also contain written instruction of the procedure to be followed in administering the medication (Appendix 1, 2 or 3).
- Where specific authorisation has been given by the Board of Management for the administration of medicine, the medicines must be brought to school by the parent/guardian/designated adult
- A written record of the date and time of administration must be kept by the person administering it (Appendix 4).
- On the cessation of the administration of medicine parents are required to inform the school in writing (Appendix 5).
- Parents/Guardians are responsible for ensuring that emergency medication is supplied to the school and replenished when necessary.
- Emergency medication must have exact details of how it is to be administered.
- The Board of Management must inform the school's insurers accordingly
- Parents are further required to indemnify the Board of Management and members of the staff in respect of any liability that may arise regarding the administration of prescribed medicines in school.
- All correspondence related to the above are kept in the school.

Medicines

- Non-prescribed medicines will neither be stored nor administered to pupils in school.
- Teachers/SNAs in the school will only administer prescribed medication when arrangements have been put in place as outlined above.
- Arrangements for the safe storage of certain emergency medicines, which must be readily accessible at all times, must be made with the Principal and class teacher of the child concerned and all SNAs.
- A teacher/SNA must not administer any medication without the specific authorisation of the Board of Management (as evidenced by the signed authorisation form - Appendix 1).
- The prescribed medicine must be self-administered if possible, under the supervision of an authorised teacher/SNA if not the parent.
- No teacher/SNA can be compelled to administer medicine or drugs to a pupil.
- In an emergency situation, qualified medical assistance will be secured at the earliest opportunity and the parents contacted.
- Where possible, the parents should arrange for the administration of prescribed medicines outside of school hours.

We are not a nut free school however the following guidelines are in place with regard to pupils with a Nut Allergy

- Staff dealing with the pupil avoid eating nuts or any item with nut trace.
- Children are not permitted to offer or exchange foods, sweets, lunches etc.
- If going off-site, medication must be carried.

In the event the pupil comes in contact with peanuts

Only in the event of anaphylactic shock should the pen be administered. Pen is stored in the classroom of the child in question. Before or immediately after Pen has been administered, an ambulance must be called.

Indicators of shock include

Symptoms of shock can include, wheezing, severe difficulty breathing and gastrointestinal symptoms such as abdominal pain, cramps, vomiting and diarrhoea.

Emergencies:

In the event of an emergency, teachers should do no more than is necessary and appropriate to relieve extreme distress or prevent further and otherwise irreparable harm. Qualified medical treatment should be secured in emergencies at the earliest opportunity.

Where no qualified medical treatment is available, and circumstances warrant immediate medical attention, designated staff members may take a child into Accident and Emergency without delay. Parents will be contacted simultaneously.

In addition, parents must ensure that teachers are made aware in writing of any medical condition which their child is suffering from. For example children who are epileptics, diabetics etc. may have a seizure at any time and teachers must be made aware of symptoms in order to ensure that treatment may be given by appropriate persons.

Written details are required from the parents/guardians outlining the child's personal details, name of medication, prescribed dosage, whether the child is capable of self-administration and the circumstances under which the medication is to be given. Parents should also outline clearly proper procedures for children who require medication for life threatening conditions.

The school maintains an up to date register of contact details of all parents/guardians including emergency numbers. This is updated in September of each new school year.

Roles and Responsibilities:

The Board of Management has overall responsibility for the implementation and monitoring of the school policy on Administration of Medication. The Principal is the day to day manager of routines contained in the policy with the collaboration of all staff members.

Success Criteria:

The effectiveness of the school policy in its present form is measured by the following criteria;

- Compliance with Health and Safety legislation
- Maintaining a safe and caring environment for children
- Positive feedback from parents/teachers
- Ensuring the primary responsibility for administering remains with parents/guardians

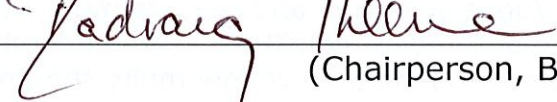

Ratification and Review:

This policy was reviewed by the school community in December ~~2018~~²⁰¹⁹. It will be reviewed in the event of incidents or on the enrolment of child/children with significant medical conditions, but no later than December ~~2019~~²⁰²⁰.

Next review December ~~2019~~²⁰²⁰

Administration of Medication Policy

Ratified by the Board of Management on 10/12/19
